Empowering Europe's mobile workforce

Empowering Europe's mobile workforce

Working across Europe opens doors to opportunities. But navigating multiple pension systems shouldn't be one of the challenges citizens face.

We understand the reality. Mobile workers have built careers spanning borders, contributed to pension systems in different countries, yet piecing together complete pension overviews feels overwhelming. Language barriers, complex regulations, and scattered information create unnecessary stress about financial futures.

ETS is changing that. We empower mobile workers across Europe through a central access point to find, understand and track their pension. Personalized, secure and no matter where in Europe they've worked.

What we provide

Through our **FindYourPension.eu** platform, we bring together pension data from across European countries into one secure, multilingual hub. As Europe's independent, non-profit central access point for pension information, we're revolutionizing how mobile workers connect with their pensions.

Find pension entitlements across all European countries where citizens have worked

Inform mobile workers with clear, personalized insights tailored to individual situations

Activate citizens to take control of pension planning with confidence

Simplifying pension journeys

With backing from EU institutions and growing partnerships with pension providers across Europe, ETS stands as the reliable guide through the European pension landscape. We're not just connecting data - we're connecting citizens to the financial security they've earned.

Our secure platform breaks down barriers, offering seamless access to complete European pension overviews. No matter where in Europe citizens have contributed, we ensure nothing gets lost in translation - literally and figuratively.

Clarity and control for Europe's mobile workers

We empower mobile workers across Europe through a central access point to find, understand and track their pension.

Bridging borders

We're expanding our network of national tracking services and pension providers. As we continue developing our full service rollout, we support national tracking services, facilitate best practice exchange, and work with policymakers to create industry standards that benefit everyone.

Get involved

ETS membership is open for national tracking services, (public and private) stakeholders from all pension pillars and pension administrators; pension associations and other relevant stakeholders. Additionally, participation is possible in the *ETS Forum on Pension Communication*.

Stakeholders are encouraged to contact
